

CIEH Professional Trainer Certificate (PTC)

Who should attend?

This course is appropriate for those who would like to train, including anyone wishing to become a Chartered Institute of Environmental Health (CIEH) registered trainer.

Overview and benefits

This is a benchmark trainer skills qualification – ideal for first time trainers who need to understand the basics of training practice, or those looking to refine their techniques. You will learn to take a flexible approach to training, which takes into account recent advances in accelerated learning and neuro-linguistic programming (NLP).

Course content

The course covers the following subjects:

- ❖ Training needs
- ❖ Learning styles and preferences
- ❖ Learning objectives
- ❖ Training skills and question techniques
- ❖ Training structure and design
- ❖ Training styles & communication
- ❖ Training assessment & evaluation
- ❖ Difficult people

Course objectives

This qualification will enable successful candidates to understand and put into practice:

- ❖ How training can best be delivered to secure effective training
- ❖ How to structure and design training sessions
- ❖ How to make training sessions interesting, stimulating and relevant

Prerequisites

Trainers or potential trainers from any discipline will benefit from the programme, as the qualification concentrates on the training process, rather than the content.

Further information

Awarding body: Chartered Institute of Environmental Health (CIEH)

Course duration: 3 days

Assessment method: candidates are required to design and deliver an individual training session to demonstrate knowledge and understanding of training principles and their application in practice.

OFOQUAL Accredited: No
